CONTENTS

No. 1, February 1989

PAGE

D. W. E. Smith. Is greater female longevity a general finding among animals? 1

M. A. Elgar. Predator vigilance and group size in mammals and birds: a critical review of the empirical evidence 13

A. C. Newton & I. R. Crute. A consideration of the genetic control of species specificity in fungal plant pathogens and its relevance to a comprehension of the underlying mechanisms 35

K. Marchetti & T. Price. Differences in the foraging of juvenile and adult birds: the importance of developmental constraints 51

No. 2, May 1989

R. M. Langille & B. K. Hall. Developmental processes, developmental sequences and early vertebrate phylogeny 73

B. G. M. Jamieson & G. W. Rouse. The spermatozoa of the polychaeta (annelida): an ultrastructural review 93

T. Alderson. Ribonucleotide metabolism – fresh approaches to viral and cancer chemotherapy 159

J. D. D. Bishop. Colony form and the exploitation of spatial refuges by encrusting bryozoa 197

No. 3, August 1989

C. Gans. Stages in the origin of vertebrates: analysis by means of scenarios . 221

G. F. Elliott. The evidence of reproductive mechanisms in fossil dasyclads (algae: chlorophyta) 269

No. 4, November 1989

A. Forsten. Horse diversity through the ages 279
J. A. Veenstra. Do insects really have a homeostatic hypotrehalosaemic hormone? 305
S. A. Barnett & R. G. Dickson. Wild mice in the cold: some findings on adaptation 317
N. W. Simmonds. How frequent are superior genotypes in plant breeding populations? 341
L. Sømme. Adaptations of terrestrial arthropods to the alpine environment . 367
A. E. Douglas. Mycetocyte symbiosis in insects 409
G. R. Ultsch. Ecology and physiology of hibernation and overwintering in freshwater fishes, turtles and snakes 435

INDEX OF AUTHORS

Alderson, T. Ribonucleotide metabolism – fresh approaches to viral and cancer chemotherapy 159
Barnett, S. A. & Dickson, R. G. Wild mice in the cold: some findings on adaptation 317
Bishop, J. D. D. Colony form and the exploitation of spatial refuges by encrusting bryozoa 197
Douglas, A. E. Mycetocyte symbiosis in insects 409
Elgar, M. A. Predator vigilance and group size in mammals and birds: a critical review of the empirical evidence 13
Elliott, G. F. The evidence of reproductive mechanisms in fossil dasyclads (algae: chlorophyta) 269
Forsten, A. Horse diversity through the ages 279
Gans, C. Stages in the origin of vertebrates: analysis by means of scenarios . 221
Jamieson, B. G. M. & Rouse, G. W. The spermatozoa of the polychaeta (annelida): an ultrastructural review 93
Langille, R. M. & Hall, B. K. Developmental processes, developmental sequences and early vertebrate phylogeny 73
Marchetti, K. & Price, T. Differences in the foraging of juvenile and adult birds: the importance of developmental constraints 51
Newton, A. C. & Crute, I. R. A consideration of the genetic control species specificity in fungal plant pathogens and its relevance to a comprehension of the underlying mechanisms 35

SIMMONDS, N. W. How frequent are superior genotypes in plant breeding populations? 341

SMITH, D. W. E. Is greater female longevity a general finding among animals? 1

SØMME, L. Adaptations of terrestrial arthropods to the alpine environment . 367

ULTSCH, G. R. Ecology and physiology of hibernation and overwintering in freshwater fishes, turtles and snakes 435

VEENSTRA, J. A. Do insects really have a homeostatic hypotrehalosaemic hormone? 305
